**Prof. Dr. Sudhir Jagtap** (M.Sc. M.Phil.Ph.D.)  
Founder & President

## TEACHING AIDS

Teachers use a variety of tools to make the process of teaching and learning simple, interesting, and effective which makes it easier for the teacher to teach even the most difficult subject. It also makes sense and saves time as students learn very quickly by watching rather than reading. Therefore teachers use teaching aids.

There are many students with a tendency to forget easily. Such students can get benefits with teaching aids. Teaching aids make the subject interesting and encourage students to learn it in depth. Teaching aids help to understand the concept easily and grasp it completely. With teaching aids, students can understand the concept by making the proper image of the topic.

Teaching aids enhance the conceptual thinking of students. Teaching aids do not make the concept boring instead it creates the environment of interest and makes it interesting to learn. With the help of teaching aids, students can learn with accuracy and even faster. It is proved that learning with visual representation stays in memory for a longer time than textual representation. It impacts better with direct experience.
